Alice
THROUGH THE LOOKING-GLASS

Join Alice as you explore the Maze of the Queen of Hearts – and discover all the wonders within.

Make your way through the looking-glass and join in the Tea Party. Face each other solo or play as a team, but watch out for the guards who protect the maze!

If you don't like reading rules, then scan this code!

Game Overview

Alice is a **competitive** game in which you try to score the most points by filling in your sheet to match specific shapes. There are **two ways to play**: the individual "Everyone for themselves" mode, which is easy to learn; and the "Team" mode, which is more technical and strategic.

IMPORTANT: *We recommend you start with the "Everyone for themselves" mode before you try out the team game. The rules explain how to play the "Everyone for themselves" mode first. After one or two games you will be familiar with how it works and you can move on to the team game, which is for 2 teams of 2 playing against each other.*

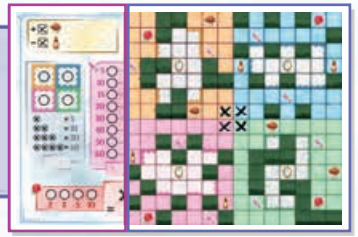

Components

1 **1 pad of checkbox sheets**
for the "Everyone for themselves" MODE.

Get yourself a pen or pencil *(not included in the game box)* and then take an **"Everyone for themselves" mode checkbox sheet.** Place it in front of you with the side that has 4 crosses in the center facing upwards.

Checkbox sheets have a front (with 4 crosses in the center) and a back.

Each side has a score zone on the left and a maze to explore on the right. The maze is divided into 4 colored zones.

Score zone Maze

2 **30 Shape cards**
There are 2 Shapes on the back of the cards: 1 is always present on the other side, too. Sometimes there is even a Rabbit!

Shuffle the ***30 Shape cards*** *(dark blue side up)* and make 3 piles of 10 cards each.

Setup

3 **12 *Tea Party* cards**
These cards are separated into 4 piles according to their value (from 2 to 5 teapots).

Sort the **12 *Tea Party* cards** by value and form 4 face-down piles, then flip over 1 card from each pile and place it next to the pile.

4 **1 Alice Pawn**

The player who is most often late receives the ***Alice* pawn**.

"Team" mode components

Place the components listed below to one side. They will only be used in "Team" mode (see corresponding tab).

2 pads of checkbox sheets *with the letters A and B on them.*

2 Key/Crown cards

4 Guard Pawns

How to play Alice

On each turn, one player flips over a ***Shape*** card. Everyone crosses off the revealed shape in their own ***Maze***. ***Bonuses*** crossed off in this way are written down in your score zone. ***Alice*** is a game where you all play **at the same time!**

The player who has the ***Alice*** pawn is the **"active player"**.

1 Flip over a card

On their turn, the active player chooses the top card from a pile of ***Shape*** cards and flips it over **for everyone to see**.

The card reveals a shape that **all players must** cross off on their checkbox sheet. There are 5 shapes.

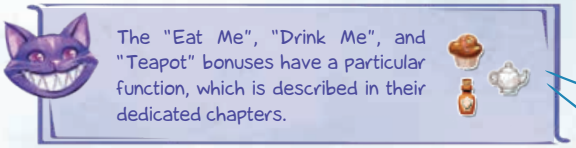

2 Crossing off your checkbox sheet

Crossing off your Maze

All players must now **reproduce the shape shown** on the card in their own ***Maze***, following the placement rules.

Apply your bonus(es)

If you cross off 1 or more ***bonus(es)*** in your ***Maze***, write it/them in your score zone. Most ***bonuses*** earn points in different ways at the end of the game.

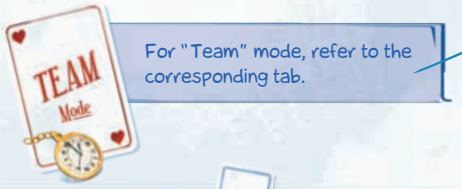

3 End of the turn

Discard the ***Shape*** card and pass the ***Alice*** pawn to the next player on your left. It is their turn to choose a new ***Shape*** card.

End of the game

The game ends when all 30 *Shape* cards have been played.

2

Crossing off your Maze

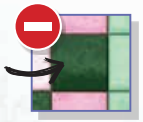

You must cross off the boxes in your ***Maze*** to reproduce the shape that was revealed, keeping to the crossing off rules below

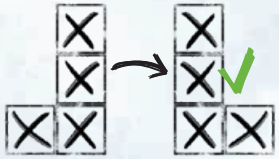

At the beginning of the game, you start with 4 boxes already crossed off in the center of your Maze.

- The shape **must touch** at least one other box that already has a cross in it.
- You **may not** cross off a box that is covered by bushes in the ***Maze***.

- You may rotate the shape **in any direction,** it may even be **mirrored.**

Special case: If you are unable to place the revealed Shape in your Maze by following the rules, cross off <u>only 1 box</u> instead *(it must be adjacent to a box with a cross already in it)*.

Example: In the first turn, the "Hat" shape is revealed. Christine crosses off the whole shape in her Maze. It is adjacent to a box with a cross already in it.

The Rabbit

Sometimes you will find a ***Rabbit*** on certain ***Shape*** cards. When it is revealed, the ***Rabbit*** **shows <u>a color, not a shape!</u>**

You must then cross off a shape of your choice *(from the 5 available)*, **<u>entirely</u>** within the color zone indicated by the ***Rabbit***. The shape must still be adjacent to at least 1 box with a cross already in it.

Reminder: If you <u>cannot</u> fill in the shape according to the color, you <u>must</u> cross off 1 box next to a box with a cross already in it, in the zone of your choice.

One of the 5 ***Rabbits*** has no color: **It is the White Rabbit!** If the White Rabbit is revealed, **<u>you choose</u>** the shape AND the color zone to place it in *(still in 1 zone only, and following the crossing off rules!)*

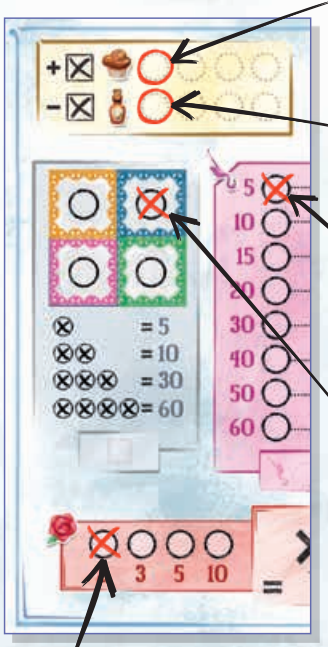

On the next turn, the pink Rabbit card is turned over. Christine crosses off 4 boxes in the Pink zone of her sheet, next to 1 box with a cross already in it.

CROSSING OFF YOUR MAZE

APPLY YOUR BONUSES

Some boxes in a ***Maze*** have a ***bonus***. When you put a cross in them, make the corresponding action.

"Eat Me": Draw around one of the dotted circles in your score zone.

"Drink Me": Draw around one of the dotted circles in your score zone.

Flamingo: Put a cross in the first empty space at the top of the "Flamingo" column in your score zone.

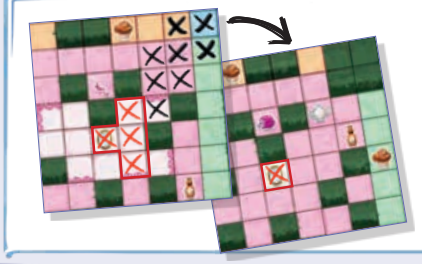

Terrace Zone: When you have crossed off **ALL the Terrace boxes in the same color zone,** put a cross in the corresponding space in your ***Terrace*** score zone.

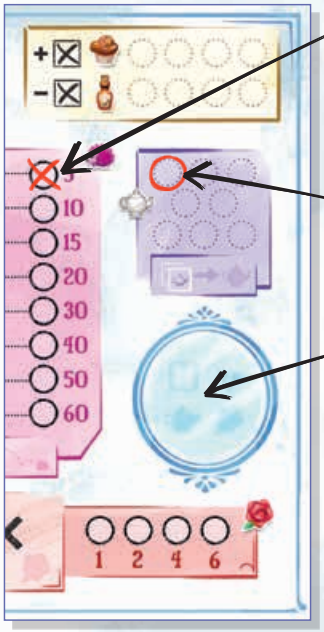

Rose: Put a cross in the first empty space on the left of the "Rose" line in your score zone.

Looking-glass: After you cross off your shape and apply any bonuses, go through the looking-glass! Turn over your sheet **and immediately put a cross in the corresponding looking-glass** in the same color as the one you just went through.

There are 4 looking-glasses: You can go from one side to the other multiple times.

On her turn, Christine crossed off the looking-glass in the Pink zone. At the end of her turn, she flips her sheet over and crosses off the looking-glass in the Pink zone on the other side. Attention: As it is her first cross on that side of the sheet, her next shape must be adjacent to this box.

Hedgehog: Put a cross in the first empty space at the top of the "Hedgehog" column in your score zone.

Teapot: Draw around one of the dotted circles in your score zone.

Write your points total here. I'll tell you about it later!

APPLY YOUR BONUSES

"EAT ME" AND "DRINK ME" BONUSES

Each dotted circle you have drawn around allows you to make one of your shapes bigger or smaller. **Put a cross in it** when you use it.

The **"Eat Me"** and **"Drink Me"** bonuses can be used as soon as they are unlocked *(drawn around)* and they can only be used **on the side of the sheet where they were gained.**

You can use **more than one "Eat Me"** and **"Drink Me"** on the same shape, as long as you follow the rules for making a shape bigger or smaller.

See opposite for how and when to use them.

"EAT ME"

Make the shape you cross off **1 box bigger.** The new box can be placed anywhere next to the revealed shape *(horizontally or vertically)*.

Ludo crosses off an "Eat Me" bonus, so he can make the basic shape of the Hat (black) 1 box bigger (red).

He could even have added 1 box (red) to the basic shape of the Hat before he started to fill it in (black).

"DRINK ME"

Make the shape you cross off **1 box smaller.** The shape must still be one single block: You cannot cut a shape in two with this ***bonus***!

Another possibility: He crosses off a "Drink Me" bonus so he can make the Hat shape using 1 less box (blue).

"EAT ME" AND "DRINK ME" BONUSES

"Teapot" Bonus

When you have more than 1 ***Teapot bonus***, you may acquire one of the face-up ***Tea Party*** cards:

- Choose a face-up ***Tea Party*** card.
- **Put a cross** in as many available circles *(already drawn around)* in your score zone as the number of teapots shown on the card.
- Take the card then flip over another card of the same value, if there is one.

Christine crosses off 3 teapots in her Maze so she draws around 3 bonus Teapots. She chooses the Tea Party card with 2 Teapots on it, worth 10 points at the end of the game. So she puts a cross in 2 of the circles in her score zone.

If several players wish to acquire the same ***Tea Party*** card during the same turn, the player who has the ***Alice*** pawn takes priority, followed by the other players, in turn order.

You may take several ***Tea Party*** cards in the same game, or even during the same turn, if you have enough available ***Teapots***.

Each ***Tea Party*** card scores the number of points shown on it at the end of the game. In addition, some cards have an effect that applies immediately after purchase *(lightning symbol ⚡)*, or a permanent power *(infinity symbol ∞)* for the rest of the game.

End of the game

When the last *Shape* card has been played, the game is over.

Fold your sheet to put the two score zones together, and add up your points.

- **Terrace Zones** - your score depends on the number of ***Terrace*** zones that you fully crossed off. Write down this value.
- **Flamingos and Hedgehogs** - your score equals the highest value matching pair on your scoresheet.
- **Teapots** - write down the value of any ***Tea Party*** card(s) obtained.
- **Roses** - multiply the last number with a cross next to it from each of the two lines. This gives your Roses score.

The player with the most points wins the game!

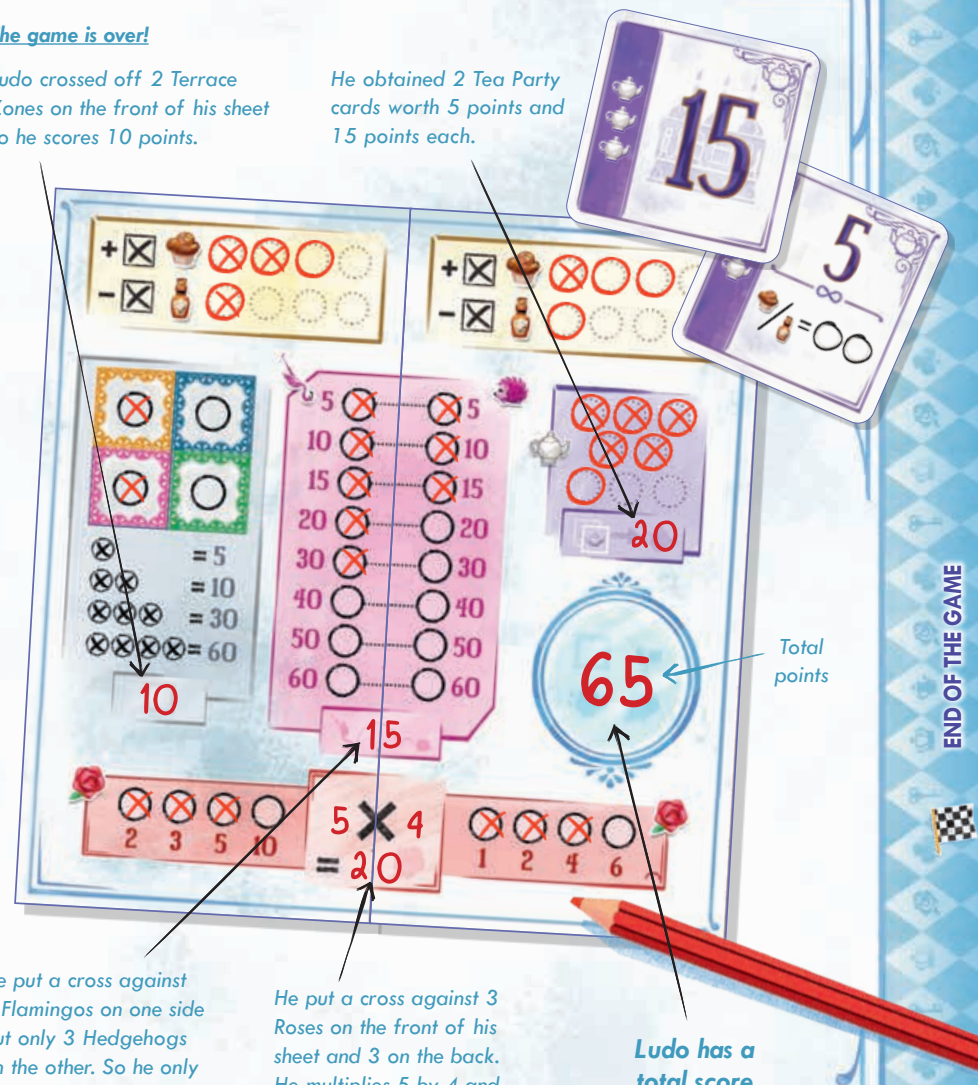

If there's a tie, have a nice cup of tea together!

The game is over!

Ludo crossed off 2 Terrace Zones on the front of his sheet so he scores 10 points.

He obtained 2 Tea Party cards worth 5 points and 15 points each.

He put a cross against 5 Flamingos on one side but only 3 Hedgehogs on the other. So he only scores 15 points.

He put a cross against 3 Roses on the front of his sheet and 3 on the back. He multiplies 5 by 4 and scores 20 points.

Ludo has a total score of 65 points!

Game Overview

Now that you are familiar with the basic rules, here are the rules of the team game. **This game mode is for 2 teams of 2 playing against each other.**

Individual mode rules apply in team mode. The differences come mainly from the bonuses that you cross off on different sheets, the way you score points, and the way teammates interact.

Setup

Players are divided into 2 teams of 2.

In each team, one player receives **Sheet A**, the other receives a **Sheet B**.

Place the two **"Key/Crown"** cards with their **"Key"** side up in the center of the table, as well as the **Guard** pawns.

The rest of the setup is the same.

How to play as a "Team"

1 Flip over a card

The team with the ***Alice*** pawn is the **"active team"**.

The active team confers and selects 1 card from a pile of ***Shape*** cards and flips it over for everyone.

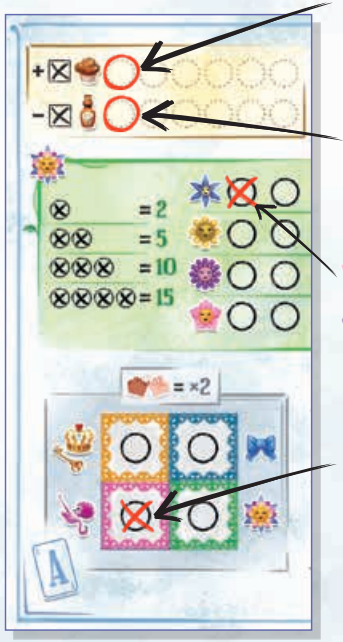

IMPORTANT: In this version of the game, the Alice pawn does not move automatically at the end of each turn *(see page 20: Blue Bow)*.

2 Crossing off your sheet

Crossing off your Maze

You must now reproduce the shape shown on the card in your own ***Maze***, following the placement rules as in the "Everyone for themselves" mode.

Apply your bonuses: Player A

"Eat Me": **Draw around one** of the dotted circles in your score zone.

"Drink Me": **Draw around one** of the dotted circles in your score zone.

Flower: **Place a cross** in a box corresponding to the same flower in your score zone.

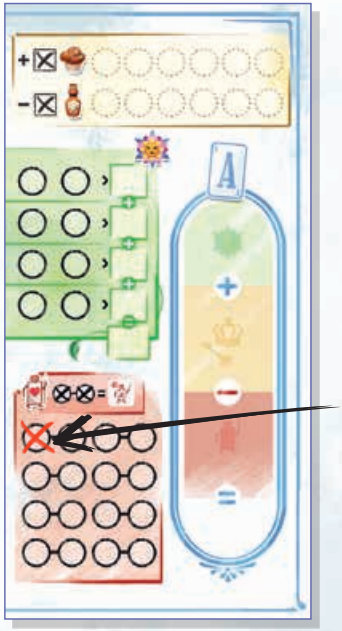

Terrace Zone: When you have crossed off **ALL the Terrace boxes in a single color zone, put a cross in** the corresponding space in your ***Terrace*** score zone.

In "Team" mode it is important that both players consult each other to cross off the same zones. See page 23.

"Eat Me" and "Drink Me" bonuses in "Team" mode

In the team version of the game, the **"Eat Me"** and **"Drink Me"** ***bonuses*** are shared. ***Player A*** **draws** them, but ***Player B*** can also use them, in agreement with ***Player A***, who will **put a cross** in the corresponding bonus space.

Looking-glass: After you cross off your shape and apply any bonuses, go through the looking-glass! Turn over your sheet and on the new side, **immediately cross off the looking-glass that matches** the color of the one you just crossed off.

Keyhole: **ATTENTION:** A keyhole can **only** be crossed off **if – and only if** – the team has a ***Key*** card! Only ***Player B*** can get it by crossing off the corresponding bonus square on their sheet *(see next page)*.

Crown: Flip the ***Key*** card to be ***Crown*** side up.

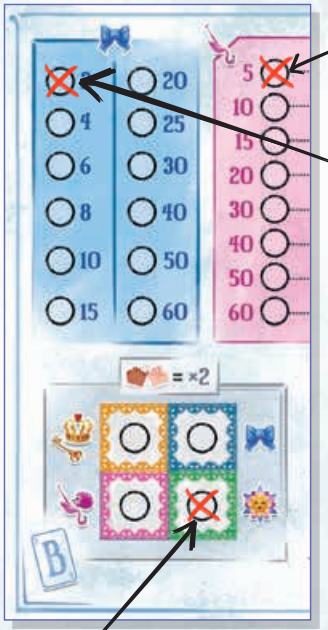

Guard: **Put a cross in the first empty space** on the top left. If you complete a pair, immediately take one of the ***Guard*** pawns from the center of the table. If there are no more there, take one from the opposing team. *(Note: A pair must always be completed before a new one is started.)*

Attention: Only 1 team can have the Crown. Once 1 team has flipped their Key card to be Crown side up, the other team may not do so. If both teams cross off the Crown in the same turn, the team that has the Alice pawn at the beginning of the turn gets the Crown.

Christine's team already has a Key card. Therefore she can cross off the Keyhole as she fills in a shape (black). On the next turn, she crosses off the Crown. This means she can flip the Key card over so it is Crown side up. Unfortunately, while she does it, she crosses off a second guard. Therefore she receives a Guard pawn.

Apply your bonuses: Player B

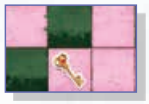

Flamingo: **Put a cross** **in the first empty space** at the top of the "Flamingo" column in your score zone.

Blue Bow: **Put a cross** **in the first empty space** in front of the lowest value in your score zone and immediately receive the ***Alice*** pawn.

Attention: If both teams cross off a bow in the same turn, the effects of the crosses are applied in turn order... so the Alice pawn ends up with the team that started the turn without it!

Key: The team takes the highest value available ***Key*** card.

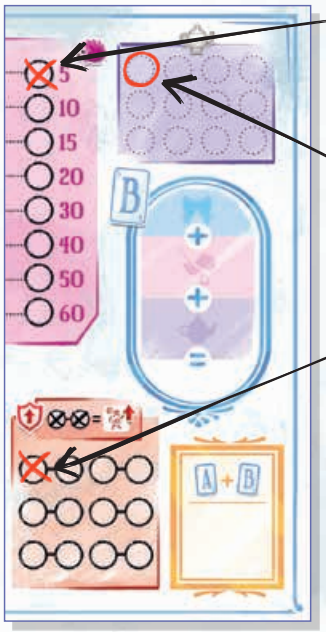

Terrace Zone: When you have crossed off **ALL the Terrace boxes in the same zone,** put a cross in the corresponding space in your ***Terrace*** score zone.

"Teapot" bonus in Team Mode

Permanent powers on ***Tea Party*** cards apply to both team members. When an **immediate effect** is triggered, teammates decide which of the two gets the benefit.

Looking-glass: After you cross off your shape and apply any bonuses, go through the looking-glass! Turn over your sheet and on the new side, **immediately cross off the looking-glass that matches** the color of the one you just crossed off.

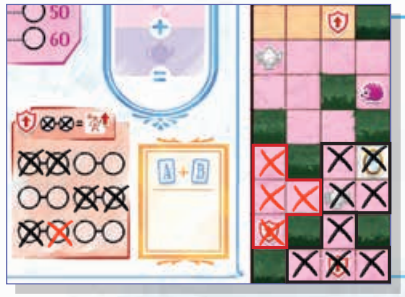

Hedgehog: **Put a cross** **in the first empty space** at the top of the "Hedgehog" column in your score zone.

Teapot: **Draw** **around one of** one of the dotted circles in your score zone.

Shield: **Put a cross** **in the first empty space** on the top left. If you complete a pair, give one of your team's Guard pawns to the other team.
(Note: A pair must always be completed before a new one is started.)

Attention: If the team does not have a Guard pawn, nothing happens!

Previously, Christine obtained a Guard pawn by crossing off a second Guard. Fortunately, by crossing off 2 shields, Ludo received the pawn and gave it to the other team!

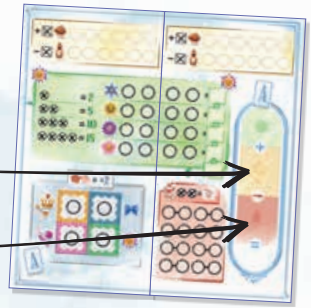

End of the game

When the last ***Shape*** card has been played, the game is over. Fold your sheet to put the two score zones together, and count up points.

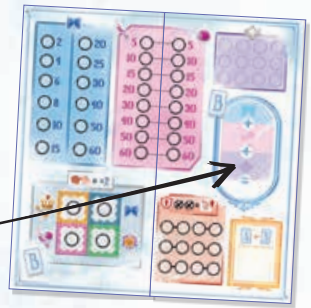

Score per player

Player A

- **Flower:** Each line scores points depending on the number of  spaces with a cross in them.
- **Crown/Key:** Enter the face up value of the card here.
- **Guard:** Enter the negative value of the team's ***Guard*** pawns here.

Player B

- **Blue Bow:** Your score equals the number of the last  space with a cross in it.
- **Flamingos and Hedgehogs:** Your score equals the last complete pair of symbols with crosses on your scoresheet.
- **Teapots:** Enter the value of ***Tea Party*** cards obtained by the team here.

Team scores

Terrace Zone Multiplier: Each ***Terrace*** zone is linked to an element in your score zone. For each identical zone both players have put a cross in, that score is doubled:

- **If both players put a cross in the Pink zone:** Player B doubles the score of the highest **Flamingos and Hedgehogs** pair.
- **If both players put a cross in the Blue zone:** Player B doubles the **Blue Bow** score.
- **If both players put a cross in the Orange zone:** Player A doubles the **Crown/Key** score.
- **If both players put a cross in the Green zone:** Player A doubles the **Flowers** score.

Apply the multiplier directly to the totals when you calculate the scores.

The team with the most points wins the game!

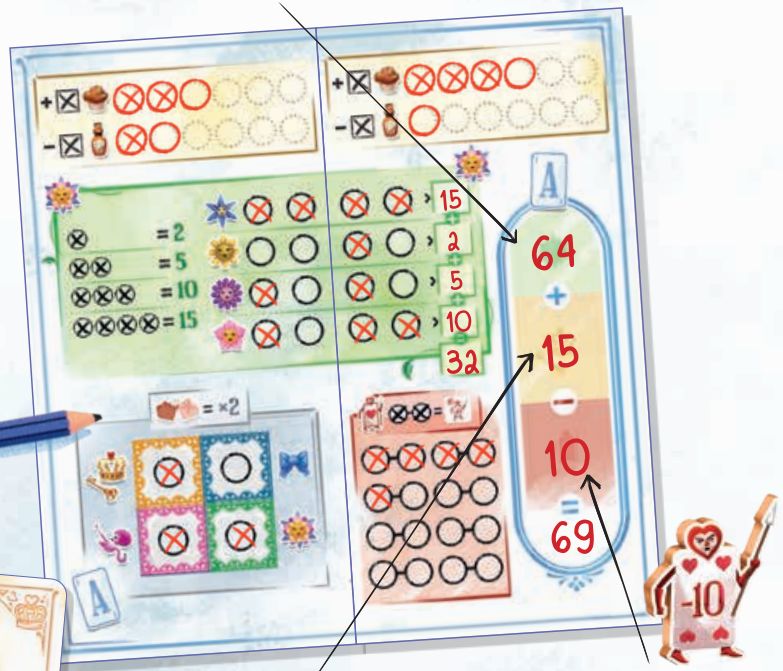

If there's a tie, all share a nice pot of tea together :)

Christine's score:

Flowers: *With 4 crosses on the first line, she scores 15 points. With only 1 cross, the second line only scores 2 points. The subsequent lines score 5 and 10 points respectively. That makes a total of 32 points.*

Ludo and Christine both crossed off the entire Pink and Green Terrace zones on their sheets. Because of the Green zone, the Flowers score another 32 points. That makes a total of 64 points.

Crown and Key: *During the game, Ludo was the first to receive the Key. But as Christine did not get the Crown before the opposition, the team only scores the 15 points from the Key.*

Christine crossed off the entire Yellow zone but Ludo did not, so the Key/Crown score is not doubled.

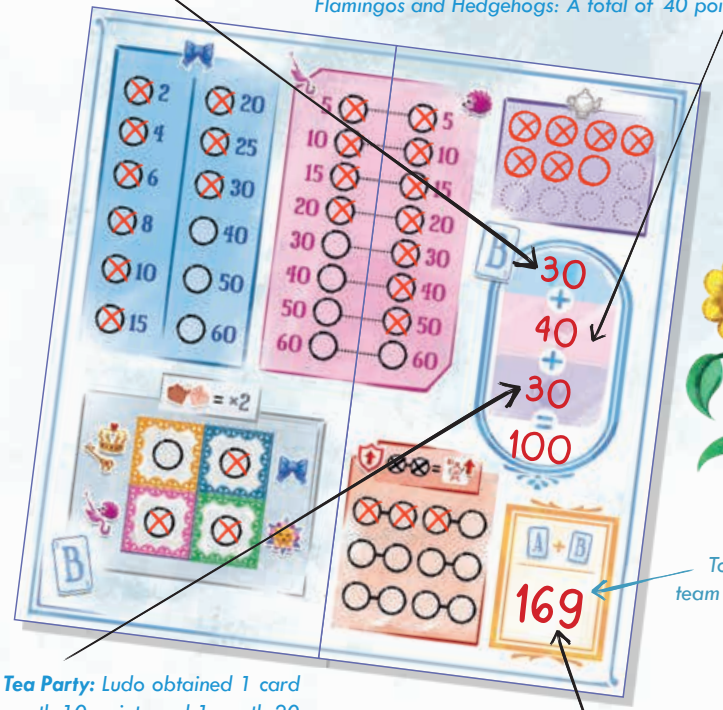

Guard and Shield: *Christine put crosses in 5 spaces. During the game, she obtained 2 Guard pawns. Fortunately, Ludo crossed off 2 shields and sent 1 Guard over to the opposing team. They have a total of -10 points from Guard pawns.*

Ludo's score:

Blue Bows: *Ludo crossed off 9 Bows. He scores 30 points from them.*

Flamingos and Hedgehogs: *With 4 complete pairs, Ludo scores 20 points.*

Ludo and Christine have both crossed off the entire Pink and Green Terrace zones on their sheets. Because of the Pink zone, he scores another 20 points from the Flamingos and Hedgehogs: A total of 40 points.

Total team points.

Tea Party: *Ludo obtained 1 card worth 10 points and 1 worth 20 points. He writes down the values here.*

The team scores a total of 169 points!

5 points at the end of the game.
Permanent power ∞ : When you cross off an **"Eat Me"** or **"Drink Me"** square in your ***Maze***, draw around 2 circles instead of just 1 in your score zone.
Attention: You are limited by the number of bonus circles with dotted lines in your score zone.

5 points at the end of the game.
Immediate effect ϟ : Cross off 2 Hedgehog boxes in your ***Maze***, even if they are not adjacent to other boxes you have already crossed off! Remember to put a cross in your score zone as well.

10 points at the end of the game.
The other players can wish you a Happy Unbirthday!

5 points at the end of the game.
Permanent power ∞ : When you are the active player *(or the active team in "Team" mode)*, you no longer flip over ***Shape*** cards. Instead, choose a shape for everyone from the back of one of the available cards, then discard that card. *If you choose a Rabbit, announce the color.*

10 points at the end of the game.
Immediate effect ϟ : Cross off 1 of the 5 shapes in the zone of your choice in your ***Maze***, as if you played the white ***Rabbit*** *(or give your teammate the benefit in "Team" mode).*

15 points at the end of the game.
The other players can wish you a Happy Unbirthday!

10 points at the end of the game.
Permanent power ∞ : From now on, you treat all Rabbits as white ***Rabbits***. This only counts for you *(and your teammate in "Team" mode).*

15 points at the end of the game.
Immediate effect ϟ : Draw a ***Shape*** card and play it for you only *(or your teammate in "Team" mode).*

20 points at the end of the game.
The other players can wish you a Happy Unbirthday!

10 points at the end of the game.
Permanent power ∞ : When you cross off a **Flamingo** or a **Hedgehog** in your ***Maze***, put a cross in 2 circles instead of just 1 in your score zone.
Attention: You are limited by the number of circles shown on your sheet.

20 points at the end of the game.
Immediate effect ϟ : Cross off a teapot in your ***Maze***. Remember to draw around a circle in your score zone.

30 points at the end of the game.
The other players can wish you a Happy Unbirthday!

Player Aid

Bonuses common to both game modes

"Eat Me": Draw around 1 dotted ***BONUS*** circle on the ***"Eat Me"*** line in your score zone. You can use an ***"Eat Me" BONUS*** to make the shape you need to cross off 1 box bigger *(this can be done in the same turn)*.

"Drink Me": Draw around 1 dotted ***BONUS*** circle from the ***"Drink Me"*** line in your score zone. You can **use** a ***"Drink Me" BONUS*** to make the shape you need to cross off 1 box smaller *(this can be done in the same turn)*. The shape must still be one single block: You cannot cut a shape in two with this ***BONUS***.

Rose: Put a cross in the first empty space on the left of the ***"Rose"*** line in your score zone.

Looking-glass: At the end of your turn, flip your sheet over and **cross off** the other looking-glass of the same color.

Teapot: Draw around 1 dotted ***BONUS*** circle from the ***"Teapot"*** area in your score zone. You can use Teapot bonuses to acquire Tea Party cards.

Terrace Zone: When you have **crossed off** ALL the terrace boxes in 1 color zone, **put a cross** in the corresponding space in your score zone.

Flamingo: Put a cross in the first empty space at the top of the ***"Flamingo"*** column on your scoresheet.

Hedgehog: Put a cross in the first empty space at the top of the ***"Hedgehog"*** column on your scoresheet.

Team mode bonuses:

Flowers: Put a cross in 1 space that matches the same flower in your score zone.

Blue bow: Put a cross in the first empty space of the lowest value in your score zone and take the ***Alice*** pawn.

Keyhole: ATTENTION: A keyhole can only be crossed off if the team has a ***Key*** card!

Key: Receive the highest value ***Key*** card.

Shield: Put a cross in the first empty space to the left. If you complete a pair, receive a ***Guard*** pawn.

Bouclier : Put a cross in the first empty space on the top left. If you complete a pair, give one of your team's ***Guard*** pawns to the opposing team, if you have one.

Crown: Flip your ***Key*** card to the ***Crown*** side. **ATTENTION:** Only 1 team can have the Crown!
